PROFESSIONAL SUMMARY

Front-end and **MERN Stack** Developer experienced in building responsive, scalable, and high-performance web applications. Skilled in **React.js, Next.js, Node.js**, and modern UI frameworks. Proficient in developing secure authentication systems, dashboards, business websites, and full-stack applications with clean, maintainable, and well-documented code. Collaborative, detail-oriented, and committed to writing maintainable, high-quality code.

EXPERIENCE

Front-end Developer - Intern | Namyata Technology | Delhi, India (Remote)   **Mar 2021 – Sep 2021**
- Developed high-quality front-end features for a yoga instructor marketplace using **TypeScript, Next.js, Redux, Sass, and Material UI**.
- Built reusable UI components, optimised rendering, and improved overall application performance.
- Contributed to SEO improvements using **Server-Side Rendering (SSR)**.

PROJECTS

1) TEXTILIA – Garments Order & Track: Live Site | GitHub (Client Site) | GitHub (Server Site)
- Developed a **full-stack garments order & production tracking system** with **role-based access control**.
- Implemented **order management, production workflow tracking, and payment processing**, including Stripe Checkout (PayFast), COD flow, and real-time order status updates.
- Built a **responsive, modern UI** using **React Query (TanStack Query)**, and **Framer Motion,** ensuring smooth navigation, search, pagination, and dark/light mode support.
- **Technologies:** React.js, Node.js, Express.js, MongoDB, Firebase Auth, JWT, Stripe, TailwindCSS, REST API

2) BITE HUB – Food Review Platform: Live Site | GitHub (Client Site) | GitHub (Server Site)
- Built a **MERN stack** community platform using Firebase for protected user access and data security.
- Developed **Search & Filter** system with a personalized **"Favorites"** feature to improve content discovery.
- Integrated a **RESTful API** and **MongoDB** backend to handle seamless food review and restaurant data.
- **Technologies:** React.js, JavaScript, Node.js, MongoDB, Express.js, Firebase, RESTful API

3) DISHVENT – Food Event Management Platform: Live Site | GitHub
- **Developed** a secure authentication workflow using **NextAuth**.
- **Implemented** add/view/manage functionalities for food items through dynamic **Next.js API** routes.
- Built responsive, clean UI components using Tailwind CSS and ensured smooth user navigation.
- **Technologies:** Next.js, NextAuth, React, Node.js, MongoDB, Tailwind CSS, REST API

SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frameworks/Libraries: React.js, Next.js, Redux, React Router, React Query (TanStack)

Styling & UI: Tailwind CSS, Material UI, Sass/SCSS, Framer Motion, Styled-components

Backend & Integration: RESTful APIs, Node.js, Express.js, MongoDB, Firebase Auth, JWT

Performance & Quality: Performance Optimization, Cross-Browser Compatibility, Debugging

Tools & Workflow: Git, GitHub (PRs/Code Reviews), Figma, Vercel, npm, Chrome DevTools
